Product description:

Our selection of manual ball valves includes the most common models found on refuelling vehicles. Application: Manual ball valves are generally used to manually control the distribution of fuel and the filling of bar feeders. Advantages: Ball valves have the advantage of being perfectly sealed at high pressure and in the long term, while avoiding pressure drops. Contact us for more information or if you can't find the right product for you. Flange: TW Fluid flow cross-section: 50mm (2'') Pressure resistance: 20 bar Maximum temperature: 60°C
