Product description:

Our selection of two-way bulkhead through ball valves includes the most common models found on refuelling vehicles. Application: These manual ball valves are used to connect two elements through a partition wall and to control the opening and closing of a circuit by a quarter-turn operation performed by hand. Advantages: - full flow - excellent sealing due to backlash compensation seals - good resistance to entry due to seat seals Features: - Connections: 3/8" Female gas BSPP - Max. pressure: 20 bar - Min/max temperature: -20°C to +80°C - Material: Nickel-plated brass
