Ø50 pneum. b.valve ps16bar double acting actuator twØ50

Product codes:

Reference:
PC222-00064
EAN13: -
UPC: -

Product attributes:

Product description:

Our selection of ball valves with double-acting actuator includes the most common models commonly found on refuelling vehicles. Application: Ball valves have the advantage of being perfectly sealed at high pressure and in the long term, while avoiding pressure drops. Advantages: Ball valves with double-acting actuators are generally used to automate the selection of distribution and/or fluid switching lines in piping systems. Contact us for more information or if you can't find the right product for you. Fluid flow cross-section: 50mm (2") Pressure resistance: 20 bar Maximum temperature: 60°C
