Product description:

The EMR4 is designed to be installed or integrated with any meter as a custody transfer approved electronic meter register for mobile and stationary bulk fueling. The EMR4 system is comprised of two separate components: The Register Head, and the IB Box. These core components, along with a series of accessories, allow the user to configure a system that meets their specific needs on the delivery vehicle, loading rack, or other liquid dispensing application. How/When to use it ? When the need to display the volume is present. Specificities : Dual Register Head System - Simultaneous operation with one IB box. Global Weights & Measures approval for installation anywhere in the world. UL, ATEX, IECEx certified. Class 1 Division 1 certification for approved installation in all mobile and stationary applications. Built-in USB for easy, 3-step software upgrades. Software upgrades continuously available on veeder.com at no charge, assuring your system can grow with your needs. Two RS-232 communication ports for easy access to data and/or remote control. Built with integrated Wi-Fi for future wireless accessibility. System design is adaptable to all meters. Optional Electronic temperature compensation Currency and volume Preset Deliveries.
