Product description:

TECHNOMETAL two-way (T type) DN100 spring loading valve with balanced pressure. Is designed for use on tank trucks, and static tanks for the loading and unloading of liquids, while preventing any risk of leakage. They are generally mounted on the lower part of the tank to ensure the passage between the tank compartment and the loading / unloading pipe. The control can be pneumatic or pneumatic with balanced closure. The construction is made of aluminum, with anodizing treatment while the seals are made of VITON. REFERENCE STANDARD: EN 13316 - Foot valve with balanced pressure.
