Aquacon® AC21005 Absorbent Element

Product codes:

Reference:
PC214-00187
EAN13: -
UPC: -

Product attributes:

Product description:

The outer layer filters out silt, rust, and other particulate contaminants. The inner layers absorb water and chemically bond it so that no water will release downstream.

When the Aquacon Cartridge reaches its water holding limit, the media swells shut and the differential pressure rapidly increases. This signals the operator that the cartridge must be changed.

- Model: AC
- Removes free and emulsified water to less than 2 ppm
- Differential pressure increase alerts operator to change cartridge
- Effectively filters silt and other particulates
- No media migration or "linting"
- East to install and remove
- Does not affect oil additives
- Fits standard filter housing
- Maximum operating temp: 250°F
- Actual cartridge may not look like image shown
