

# PNEUMATIC CONTACT 3/2 NO BUTTON MOUNTING - PXB-B3921

## Product codes:

Reference:  
PC401-00037  
EAN13: -  
UPC: -

## Product attributes:

## Product description:

The 3/2 normally open (NO) pneumatic contact plays a key role in controlling compressed air circuits within automated systems. Designed to be mounted on a push button, it allows precise regulation of the air supply. Thus, when the button is at rest, the circuit remains open and no air flows. However, as soon as the button is pressed, the contact switches instantly, directing the airflow to downstream components such as cylinders, valves, or pneumatic actuators.

Thanks to its simple yet robust design, this component easily integrates into various industrial environments. Moreover, its operational reliability minimizes the risk of failure, ensuring a long service life even under intensive use. Therefore, it offers an ideal solution for installations requiring safe, fast, and precise manual control.

Additionally, its compact size facilitates integration into tight spaces while maintaining consistent performance. As a result, the 3/2 NO pneumatic contact is perfectly suited for a wide range of industrial applications where precision and safety in pneumatic control are critical.
